

# 2020 National Household Survey

Key Findings | Individual and Community Preparedness Division

# FEMA

# FEMA National Household Survey (NHS)

Six NHS hazard oversample regions	
	Tornado
	Flood
	Hurricane
	Wildfire
	Earthquake
	Urban Event

- The NHS assesses how the **culture of personal disaster preparedness and resilience** has changed over time in the United States.
- FEMA has conducted this survey **annually since 2013**.
- Data from the NHS is collected using an English and Spanish **telephone interview survey**.
- Individuals whose primary phone number is associated with a landline or cellular phone are **randomly selected** to take the survey.
- All respondents ( $n=5,020$ ) answer the same set of NHS core questions.
  - Respondents living in areas prone to one of the six hazard-specific oversample regions ( $n=3,008$ ) answer additional preparedness questions relevant to their given hazard.

# Strategic Plan

Helping People. Together.

FEMA Mission: **Helping people before, during, and after disasters.**

## Increase the percentage of people who have taken preparedness actions

62%  
in 2019

# 68%

of adults have pursued three or more of the six basic preparedness actions.

## Increase the percentage of people with savings set aside for an emergency

69%  
in 2019

# 68%

of adults have set aside some money for an emergency.

# Key Takeaways from the 2020 NHS on the Culture of Preparedness

## Tidal Wave of Culture Change

The majority of the U.S. population continues to invest time in disaster preparation activities. Additionally, positive shifts in an individual's intentionality to prepare presents important opportunities to influence and support individuals who want to create or maintain a more active preparedness posture.

## Influencers are Defined and Remain Effective

Preparedness influencers continue to work independently as effective predictors of preparedness behaviors. Specifically, awareness, experience, and efficacy, have meaningful and measurable impacts on preparedness behavior.

## Preparedness Actions Cluster Together

Engaging with one type of preparedness action is associated with engaging in others. By encouraging individuals to take one action, there is an expectation that they will engage in others as well.

## Customization is Key

Preparedness varies based on a variety of factors such as the stage of change or hazard. The result is that by understanding who and where, we can create relevant messages for the public that may have a greater success rate.

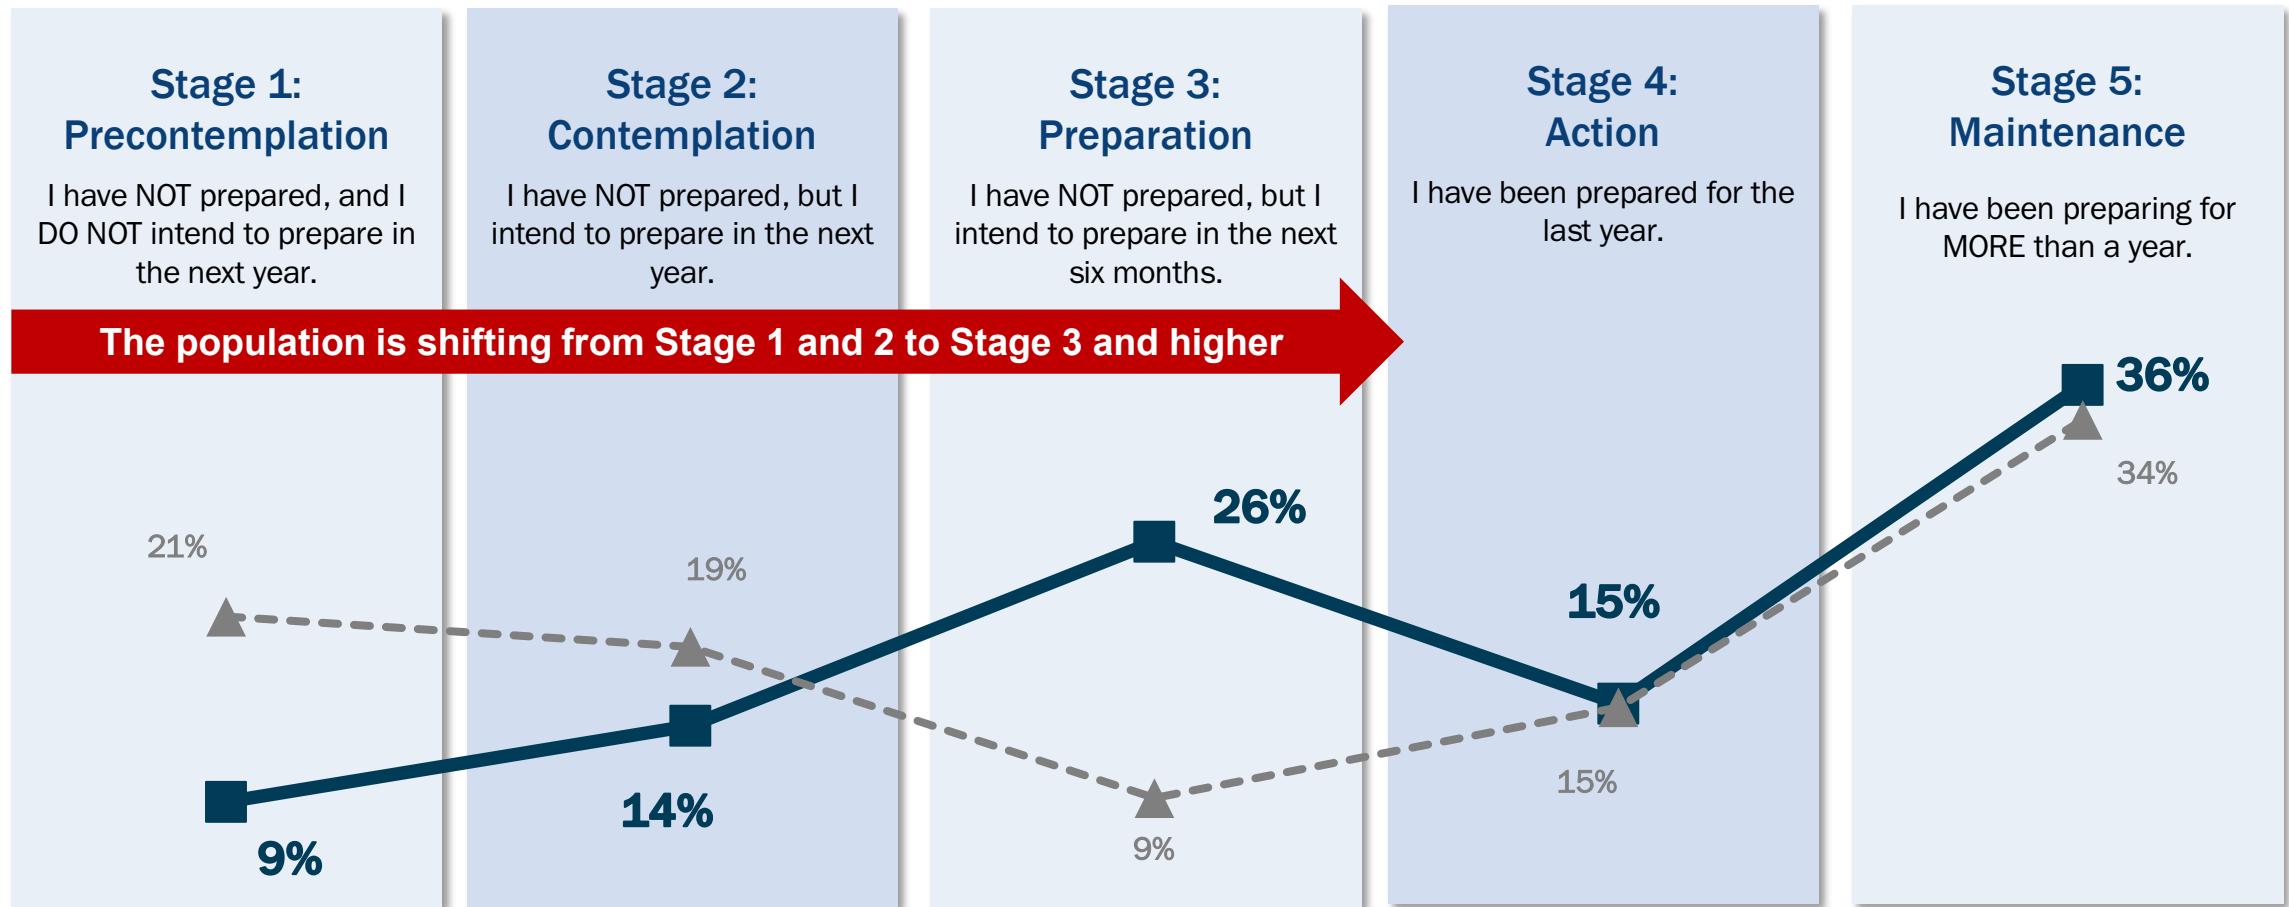

The approach to changing preparedness culture should be customized by an individual's stage of readiness to take action as opposed to any socio-demographic differences.

# Key Influencers to Hazard Preparedness

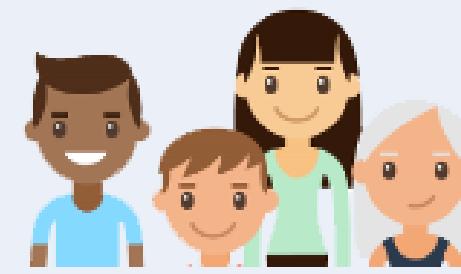

Influence	Awareness of Information	Experience with Disasters	Preparedness Efficacy	Risk Perception
Survey Findings	<b>47%</b> have read, seen, or heard information in the past six months about how to get better prepared for a disaster.	<b>47%</b> have personal or familial experience with the impacts of a disaster.	<b>47%</b> believe that preparing can help in a disaster AND are confident in their abilities to prepare.	<b>98%</b> acknowledge that the occurrence of at least one disaster type could impact where they live.
Why is this important	<b>Awareness</b> seems to be strongly <b>correlated</b> with engagement with other preparedness <b>behaviors</b> .	Experiencing a disaster seems to be a <b>motivating factor</b> for individuals to become <b>more prepared and sustain preparedness actions over time</b> .	<b>Efficacy is correlated with preparedness behaviors.</b> Increasing efficacy will support an individual's confidence in their ability to become better prepared.	Most of the respondents acknowledge the inherent risks of a disaster. <b>No differences by socio-demographics or preparedness actions or influencers</b> were observed.

# Preparedness Actions

Six basic preparedness actions lay the groundwork for pursuing other actions

Gather supplies to last 3 or more days

**81%**

Talk with others on getting prepared

**48%**

Attend a local meeting or training

**29%**

Seek information on preparedness

**65%**

Participate in an emergency drill

**56%**

Make an emergency plan

**48%**

In 2020, **68%** took three or more of these six preparedness actions, and **96%** took at least one of these six actions.

**FEMA**

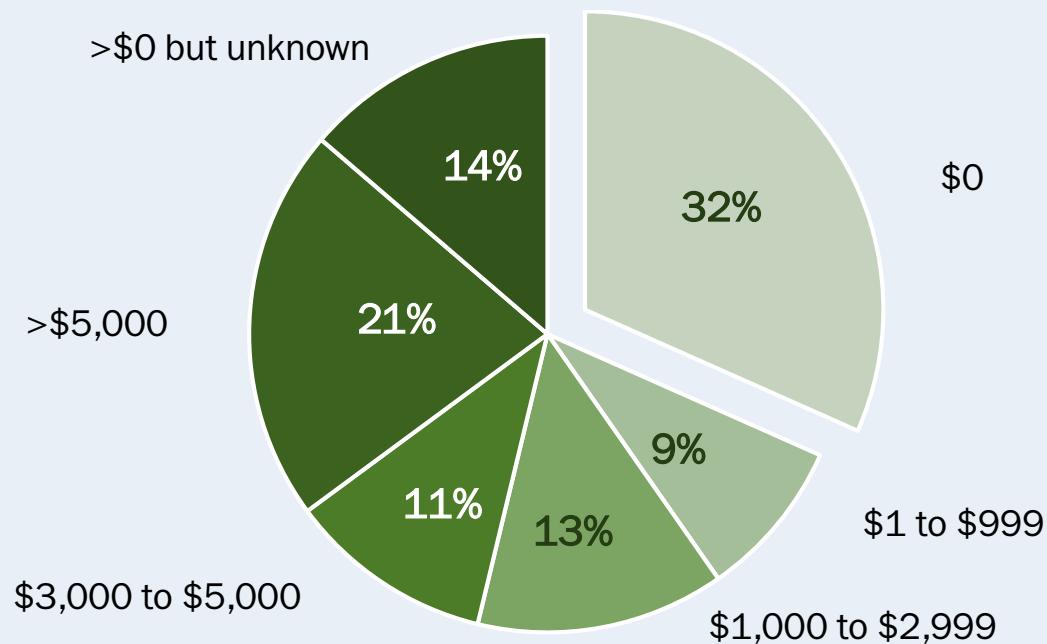

Federal Emergency Management Agency

# Financial Resilience Indicators

**68%** of adults have set aside money for an emergency

**Insuring Property**

**77%** of households have homeowners or renters insurance policies.

**22%** of households have a flood insurance policy.

**FEMA**

Federal Emergency Management Agency

10

# Preparedness Actions by Hazard Area

Individuals residing in hurricane areas are more likely to have taken community-based action or have prepared a plan compared to individuals residing in other hazard areas or to the Nation as a whole.

These results focus on preparation for any <u>hazard in general</u>	Has Gathered Supplies for 3+ Days	Has Talked with Others	Has Attended Local Meeting	Has Sought Information	Has Participated in an Emergency Drill	Has Made an Emergency Plan
						
Tornado Areas	84%	56%	31%	69%	59%	61%
Flood Areas	79%	43%	27%	63%	53%	39%
Hurricane Areas	82%	63%	34%	76%	57%	67%
Wildfire Areas	86%	60%	35%	74%	64%	52%
Earthquake Areas	83%	54%	33%	66%	63%	53%
Urban Event Areas	75%	44%	24%	62%	50%	39%
Nation	81%	48%	29%	65%	56%	48%
